ARCHIVE APPLIANCES

PROFESSIONAL MEDIA ARCHIVING WITH CACHE-A LTO ARCHIVE APPLIANCES

Can you afford to lose your valuable video content?
It took time and money to create the data behind your video.
Isn't that worth protecting?

Hard disk drives can't offer the protection or cost effectiveness of LTO tape when it comes to assuring your content data will be there the next time you want it. Cache-A's archive appliances are network-attached, easily deployed and optimized for the workflows and file sizes encountered in professional media environments. With our built-in catalog database, Cache-A systems easily track virtually unlimited video data across all your tapes. Archives are on secure, portable LTO tape cartridges with a 30-year archival life that are used throughout the IT industry. Cache-A systems are ideal for archiving source masters or entire projects and can manage a deep archive of hundreds of Terabytes with quick access to any asset.

Cache-A has Archive Appliance models for every need:
